## Local Government Solutions to Global Climate Change

So your local government is using compact fluorescents and has added hybrid vehicles to its municipal fleet. What's next? Will your community be a leader in measuring and reducing greenhouse gas emissions, saving energy costs, and planning for the future? How can your local government take its climate change initiative to the next level? These workshops will bring together local, state and national experts to help local governments figure out the ins and outs of climate change and energy policy in Florida. Aimed specifically at local government leaders and staff, the half-day sessions will cover issues like land use, transportation, and energy.

At these workshops you will:

- ❖ Hear what the State of Florida is doing today to combat climate change, and *how state programs can help you at the local level.*
- ❖ Learn what your peers around the state are doing, and how their programs *reduce energy costs* as they reduce greenhouse gas emissions.
- ❖ Find out what the most effective things are you can do *today* to reduce greenhouse emissions.
- ❖ Get *hands-on technical help* to measure your local greenhouse gas emissions and develop a local climate and energy program.

Offered at two locations:

**Miami**  
 Tuesday, June 24 1:00 to 5:00 p.m.  
 In conjunction with the Florida Association of Counties Annual Meeting

**Tampa**  
 Thursday, August 14 8:30 a.m. to 12:30 p.m.  
 In conjunction with the Florida League of Cities Annual Meeting
